Education

2025 - Current
M.Sc. Interdisciplinary Neuroscience
Goethe University Frankfurt, Germany

2019-2024
Integrated M.Tech in Biotechnology
Dr. D.Y. Patil Vidyapeeth
Final grade: 9.31/10

Skills

Technical Skills

Programming:
Python, R, Bash, Matlab

Bioinformatics:
GATK, BWA, Bowtie, Samtools, FastQC, BLAST

Neuroimaging:
BrainVoyager, fMRI analysis, Brain Connectivity

Data Science:
Pandas, NumPy, Scikit-learn

Wet-Lab skills:

DNA/RNA Extraction,PCR, Gel Electrophoresis

Mammalian Cell Culture

Research Experience

INS Lab Rotation Intern, University Hospital Frankfurt,

Supervisor: Dr. Andreas Chiocchetti, May 2026 – Present,

Using machine learning on psychiatric hospital data to predict readmission risk.

INS Lab Rotation Intern, University Hospital Frankfurt,

Supervisor: Dr Bittner, Mar 2026–Present,

Assisting with fMRI data analysis and brain connectivity research.

***Associate Biomarker Scientist**, **BiomarkIQ Scientific Technologies Pvt. Ltd**, India, Aug 2024 – Nov 2025*

Screened 200+ cancer research papers to identify early detection biomarkers and contributed to the VarSee AI pipeline using Python for data curation and ML-based biomarker discovery.

***Bioinformatics Intern**, **MyGenomeBox India Pvt. Ltd., Pune, India,** Jul 2023 – Jun 2024*

Developed a GATK–Python pipeline for variant detection in immunodeficiency disorders, transforming NGS data into automated patient-ready reports.

Projects

Brain Network Analysis in Schizophrenia Patients
Functional brain network analysis using neuroimaging data.

Lung Cancer Risk Predictor Using Machine Learning
Built **ML model** for lung cancer risk prediction using biomarker dataset.

Computational Pipeline for Primary Immunodeficiency Disorders. (Thesis Project)
Developed a **Python–GATK pipeline** for pathogenic variant detection from NGS data.

Codon Bias and Gene Clustering in Mycobacterium Species
Analysed codon usage patterns using **RSCU analysis and clustering methods**.
